Subject: Request for Permission to Access **Peripheral Blood Film (PBF) Sample Slides** for Undergraduate Research Purposes.

Dear Sir,

We, the undersigned research team, are working under the supervision of Professor Dr. Muhammad Nomani Kabir and Associate Professor Dr. SM Rafiqul Islam. We are currently conducting a research project on the classification of leukemia cells, where our primary focus is to analyze and compare different types of leukemia cells using advanced methodologies, for example machine learning (ML) and Artificial Neuronal Network (ANN).

For our study, we humbly seek your permission to access the **PBF sample slides** related to leukemia cases from your esteemed institution. The availability of these slides will significantly contribute to the accuracy, reliability, precision diagnosis and success of our research. We assure you that all shared materials will be handled with the utmost responsibility, strictly for academic and research purposes, maintaining all ethical guidelines and confidentiality standards. We are prepared to comply with any formalities or requirements necessary to facilitate this process.

We sincerely request your kind consideration and support in granting us this permission so that we may proceed with our research effectively.

Thank you for your time and kind cooperation.

Research Team:
